OBJECTIVE

I am pursuing a transition into the Data Science industry. My motivation has pushed me to learn the necessary tools and apply them to personal projects alongside my demanding job in the aerospace industry. I believe my expertise as an RF engineer, specifically in the signal processing field, gives me an interesting perspective to contribute to a team.

EXPERIENCE

Ball Aerospace **Jun. 2021 — Present**
RF Engineer *Broomfield, CO*

- Used Python knowledge to create useful plotting and RF analysis tools
- Simulated, designed, and tested an RF Front-End PWB at extreme temperatures
- Debugged complex, mission-critical RF boards under strict time constraints
- Built an embedded webpage used to interact with a phased array antenna
- High-power testing of real antenna loads

Colorado State University **Jan. 2021 — May 2022**
Graduate Research Assistant — Thesis *Fort Collins, CO*

- Design, schematic, and layout of a modular, X-band, FMCW drone radar
- Signal processing / data visualization for Analog Device's FMCW Phaser Board
- Work for the Phaser Board was presented at IMS 2022 and IEEE-APS 2022
- Will personally be presenting work at the International Phased Array Symposium
- Built a server to host and display real-time and historical radar data using PostGreSQL, Flask, Python

CHILL Radar Lab **May 2020 — May 2021**
Lab Assistant *Greeley, CO*

- Built a real-time radar display to easily display and animate radar data
- Performed characterizations and measurements of radar equipment

EDUCATION

Colorado State University **Jan. 2021 — May 2022**
*M.S. Electrical Engineering — **GPA: 3.9*** *Fort Collins, CO*
Thesis - Design, Deployment, and Cost Considerations for DARMA; A Low-Cost and Lightweight FMCW Radar

Colorado State University **Aug. 2017 — May 2021**
*B.S. Electrical Engineering — **GPA: 3.47*** *Fort Collins, CO*

PROJECTS

5G Electronics Senior Design Project **Jun. 2020 — May 2021**

- Simulated, assembled, and measured a full 5G receiver system
- Created teaching documentation for a 5G transmitter and receiver for FR1 and FR2 frequency bands
- Experience using FieldFox, EMPro, ADS, SystemVue

Fuzzy Logic Clutter Filter **Nov. 2020 — Dec. 2020**

- Applied the Fuzzy Logic machine learning technique to radar data as a clutter filter

Environment-Mapping Car **Nov. 2020 — Dec. 2020**

- Built and programmed battery-powered car with attached ultrasonic sensor for mobile mapping of the surrounding environment

SKILLS & ABILITIES

Languages: Python, SQL, C, Bash, Matlab, JavaScript, HTML, CSS
Technologies / Tools: Git, LaTeX, Linux, Docker, PostGreSQL/TimescaleDB, Flask, Celery (Distributed Tasks)
Communication: Excellent Technical Communication and Presentation Skills, Experience Presenting PDR/CDRs, Technical Paper/Presentation Formatting, Concise Code Documentation
